## FOOD CAN BE DANGEROUS FOR YOUR HEALTH!

When you go to a restaurant you often think that the food you are ordering is good for you. But many restaurants serve healthy food, like fish or salad, with a sauce or dressing that uses a lot of oil, fat, or sugar. The British Food Standards Agency wants all restaurants to say in their menus exactly what is in each dish, how many calories, how much fat, and what additives. They think that restaurants don't give their customers enough information, and that this new plan could help people to have a healthier diet.

But chefs are not happy with the Agency's plan. One top chef said, 'people are not stupid. They know that many sauces have butter and cream in them. But if we put on a menu that a dish has 1,000 calories, nobody is going to order it!'

However, many doctors agree with the plan. Bruce Ward, Professor of Medicine, said, 'people know that cigarettes are bad for them, because it tells you on the packet. But when they go to a restaurant they often have no idea if the food is healthy or not. Food products that have a lot of calories, fat, and sugar need a health warning, exactly like cigarettes.'

73. Many restaurants ....

- A  serve healthy food. B  only serve fish and salad.  
C  serve healthy food but with unhealthy sauces.

74. The British Food Standards Agency wants restaurants....

- A  to serve healthy food.      B  to give more information about their dishes.  
C  not to use fat and additives.

75. Chefs think that....

- A  people are not going to order their dishes.      B  people are stupid.  
C  cream and butter are good for you.

76. Doctors think that people...

- A  need more information about cigarettes. B  need more information about food.  
C  need to stop eating in restaurants.
